ODYSSEY® Performance Series™ 4D-1300 and 8D-1500 Batteries – meeting the increased power demands of today’s vehicles

Whether it’s a heavy duty commercial truck, an earth mover, a bus or a marine application, you depend on the vehicle’s electronics to provide valuable data, direction and even safety features. Therefore, you need a battery that can power those features without worry of failure.

ODYSSEY® Performance Series™ 4D-1300 and 8D-1500 batteries now are available to meet the ever-increasing power demands of today’s heavy vehicle applications.

The 4D-1300 and 8D-1500 feature:

• Thin Plate Pure Lead (TPPL) technology, contributing to twice the overall power and 30% more life over conventional batteries
• A sealed design, resulting in a virtually maintenance-free battery
• The ability to resist extreme vibration, protecting against high impact shock vibrations that often lead to premature failure

Bottom line? ODYSSEY Performance Series 4D-1300 and 8D-1500 batteries can provide more power for longer, with far less maintenance and a lower Total Cost of Ownership (TCO).
