READING, Pa., (November 3, 2015) – EnerSys® (NYSE:ENS), the global leader in stored energy solutions for industrial applications and manufacturer of ODYSSEY® batteries, introduces its new line of ODYSSEY® battery portable chargers at the 2015 Specialty Equipment Market Association (SEMA) Show, Nov. 3-6, in the Central Hall of the Las Vegas Convention Center, Las Vegas, Nevada, ODYSSEY® battery booth no. 24875.

With automatic six-stage charging and a wide range of built-in safety features, new ODYSSEY® battery portable chargers facilitate full and proper charging, which may help to enhance the performance and extend the life of ODYSSEY® batteries and other quality brands of 12-volt flooded and Absorbed Glass Mat (AGM) lead acid batteries. Charger safety features include: spark-free connections, built-in over-voltage, overload, over-temperature, reverse polarity and ignition protection.

“The professional grade design of our new series of chargers delivers performance and quality,” said Alan Kohler, ODYSSEY® battery marketing manager at EnerSys. “The combination of robust construction and precision engineering delivers a product that’s built to last.”

The all-digital power charging platform is packaged in a rugged

-more-

housing of extruded aluminum, providing weatherproof protection in all conditions.

In addition, they feature a user-friendly interface with an innovative LED battery charge monitor that provides users with a relative charge level status at a glance during operation. A system “OK” and battery fault trouble status indicator eliminate time-consuming troubleshooting by confirming that system and battery connections are intact or indicating if a fault is present prior to charging the battery.

The new ODYSSEY® battery portable chargers feature an integrated cable wrap body design, enabling cables to be wrapped around the body of the charger to minimize storage space.

ODYSSEY® battery portable chargers provide six-stage charging and are available in 6-amp, 12-amp and 20-amp models. They are backed by a limited two-year full replacement warranty from manufacturer’s defects.

“Properly charged batteries yield higher cycles,” said Kohler. “Our ODYSSEY® battery portable chargers optimize battery life by making it easy to properly charge today’s high performance batteries.”
