EnerSys® to Showcase ODYSSEY® Battery Product Offering for Powersport Applications at 2018 AIMExpo

READING, Pennsylvania, September 11, 2018 – EnerSys® (NYSE:ENS), the global leader in stored energy solutions for industrial applications and the manufacturer of ODYSSEY® batteries, will feature its powerful and rugged ODYSSEY® Extreme Series™ batteries, as well as its ODYSSEY® battery portable chargers at booth no. 1638 at the 2018 AIMExpo. The AIMExpo will take place October 11-14 at the Mandalay Bay Convention Center, Las Vegas, Nevada.

ODYSSEY® Extreme Series™ batteries are designed with Thin Plate Pure Lead (TPPL) technology to deliver the power and durability required by powersport vehicles, such as motorcycles, Utility Terrain Vehicles (UTVs), All Terrain Vehicles (ATVs) and personal watercraft. ODYSSEY® Extreme Series™ batteries provide twice the overall power and three times the life of conventional batteries, as well as up to 400 charge-discharge cycles to 80 percent depth of discharge. Additionally, dry cell Absorbed Glass Mat (AGM) separators hold acid in place to prevent spills, even when the battery is installed on its side.

“ODYSSEY® Extreme Series™ batteries deliver both power and endurance, making them the perfect choice for just about any powersport application,” said Alan Kohler, transportation and specialty marketing manager at EnerSys. “The design of ODYSSEY® Extreme Series™ batteries allows them to withstand shock and vibration, providing riders with the reliability and durability to take on any adventure.”

ODYSSEY® Extreme Series™ batteries for powersport applications are available in a range of sizes, as small as 5.43" L x 3.39" W x 3.90" H to as large as 7.87" L x 6.66" W x 7.60" H. Additionally, select models are available with a metal casing for high heat applications. ODYSSEY® batteries feature a three- to 10-year service life and two-year storage life at 77 degrees Fahrenheit (25 degrees Celsius). They are vibration resistant, classified as "non-spillable" by the U.S. Department of Transportation and include a limited two- to four-year full replacement warranty.

ODYSSEY® battery portable chargers feature automatic six-stage charging and a wide range of built-in safety features. They facilitate full and proper charging, which may help to enhance the performance and extend the life of ODYSSEY® batteries and other quality brands of 12-volt flooded and AGM lead acid batteries.

ODYSSEY® battery portable chargers are available in 6-amp, 12-amp and 20-amp models. They are backed by a limited two-year full replacement warranty.

ABOUT ENERSYS®

EnerSys, the global leader in stored energy solutions for industrial applications, manufactures and distributes reserve power and motive power batteries, battery chargers, power equipment, battery accessories and outdoor equipment enclosure solutions to customers worldwide. Motive power batteries and chargers are utilized in electric forklift trucks and other commercial electric-powered vehicles. Reserve power batteries are used in the telecommunication and utility industries, uninterruptible power supplies, and numerous applications requiring stored energy solutions including medical, aerospace and defense systems. Outdoor equipment enclosure products are utilized in the telecommunication, cable, utility, transportation industries and by government and defense customers. The company also provides aftermarket and customer support services to its customers from over 100 countries through its sales and manufacturing locations around the world.
