ODYSSEY® Performance ODP-AGM4D and ODP-AGM8D batteries – meeting the increased power demands of today’s vehicles

Whether it’s a heavy duty commercial truck, an earth mover, a bus or a marine application, you depend on the vehicle’s electronics to provide valuable data, direction and even safety features. Therefore, you need a battery that can power those features without the worry of failure.

ODYSSEY® Performance ODP-AGM4D and ODP-AGM8D batteries are now available to meet the ever-increasing power demands of today’s heavy vehicle applications.

The ODP-AGM4D and ODP-AGM8D feature:

- Thin Plate Pure Lead (TPPL) technology, contributing to twice the overall power and three times the life of conventional batteries
- A sealed design, resulting in a virtually maintenance-free battery
- The ability to resist extreme vibration, protecting against high impact shock vibrations that often lead to premature failure

Bottom line? ODYSSEY Performance ODP-AGM4D and ODP-AGM8D batteries can provide more power for longer, with far less maintenance and a lower Total Cost of Ownership (TCO).
